## ABOUT THE CLINIC

➤ A practice-oriented course (7 CFU) that offers a critical understanding of the most current issues related to migration and asylum law. Among others:

- The EU governance of migration and border regime
- The Italian strategies of border control
- The EU and Italian politics of asylum
- The strategies of criminalization of migration and solidarity
- Migrant labor, exploitation, and illegal gangmastering

The course provides students with critical theoretical frameworks to understand international migration and the policies that govern it. It also offers an in-depth analysis of the most relevant legal tools that regulate migration at the national and EU levels. Each year, the course hosts lawyers, international scholars, and other experts to provide students with a multidisciplinary approach and a dynamic educational experience.

➤ A public 'Front Office' service where students - working on real legal cases under the supervision of expert lawyers - give legal information to migrants and refugees. The Clinic's Front Office is open weekly on Thursday afternoon in via Luigi Montuori 5 (Garbatella).

➤ Several research projects in collaboration with other Universities, associations, and NGOs that students can join if interested.
